## ADVERTISEMENT.

In revising the Latin Rudiments for a Fifth Edition, the attention of the Editor has been chiefly directed to the improvement of the latter part of the Appendix. He has introduced some farther remarks on Compound Verbs,partly the result of his own investigations, and partly collected from other sources,-and has inserted Ruddiman's Rules for the Conjugation of Verbs, as the speediest and surest mode of fixing in the minds of young pupils this important part of elementary instruction. The remarks under the Rules for the Gender of Nouns have been extended and improved. For much of the additional matter which will be found under the Rules for the Quantity of Syllables, the Editor has to acknowledge his obligations to Professor Ramsay's excellent Treatise on Latin Prosody, a work in which the whole subject of Quantity and Versification has been treated with a degree of minuteness and skill which ought to recommend it to the careful study of every Teacher.

Eighteen and nineteen are more properly expressed by duodeviginti, and undeviginti ; from which Ordinals, Distributives, and Adverbs, are likewise formed. The same form may be employed in the corresponding numbers of each of the other decades: as, duodetriginta, twenty-eight; undetriginta, twenty-nine; \&c.

The Cardinal Numbers, except unus and mille, want the Singular.
Unus is not used in the Plural, except when joined with a substantive which wants the Singular : as, una maenia, one wall; or when several particulars are considered as one whole: as, una vestimenta, one suit of clothes.

Duo, two, and Tres, three, are thus declined:

Ambo, both, is declined as duo.

All the Cardinal Numbers from quatuor to centum inclusive, are Indeclinable; and, from centum to mille, they are declined as the Plural of bonus.

Mille, when placed before a Genitive Plural, is a Substantive indeclinable in the Singular, and, in the Plural, declined millia, millium, millibus, \&c., but, when it has a Substantive joined to it in any other case, it is a Plural Adjective indeclinable.

## COMPARISON OF ADJECTIVES.

Those Adjectives only can be compared whose signification can be increased or diminished.

There are three degrees of Comparison: Positive, Comparative, and Superlative.

The Positive is an Adjective of the First and Second Declension, or of the Third only; the Comparative is always of the Third ; the Superlative is always of the First and Second.

Rules.- 1. The Comparative is formed from the first case of the Positive in $i$, by adding or for the Masculine and Feminine, and $u s$ for the Neuter: as,

Doctus, learned, Gen. docti; Comparative, docti-or for the Masc. docti-or for the Fem. docti-us for the Neuter, more learned.
Mitis, meek, Dat. miti; Comparative, miti-or for the Masc. miti-or for the Fem. miti-us for the Neuter, more meek.
2. The Superlative is formed from the first case of the Positive in $i$ by adding ssimus : as,

Gen. Docti ; Superlative, docti-ssimus, $-a$, $-u m$, most learned.
Dat. Miti; Sup. miti-ssimus, $-a$, $-u m$, most meek.
3. If the Positive end in er, the Superlative is formed by adding rimus to the Nominative Singular Masculine: as,

Nom. Pulcher, fair ; Sup. pulcher-rimus, $-a$, -um, most fair. Nom. Pauper, poor ; Sup.pauper-rimus, $-a,-u m$, most poor.

Pos.
Firmus, strong; Fortis, brave; Liber, free ; Piger, slow; Prudens, wise; Velox, swift;

Sup.

## IRREGULAR COMPARISONS.

| Multus, | Plus, n | Plurimus, | Much, | , | most |
| Parvus, | Minor, | Minimus, | Little, | less, | least |

Note.-Plus is used only in the Neuter Gender in the Singular; it is regular in the Plural, and has plura, and sometimes pluria, in the Nom. Acc. and Voc. Neuter.

See Appendix, page 105. ᄂ

## Different kinds of Nouns and Adjectives.

A Collective Noun signifies " many" in the Singular number: as, popülus, a people; exercittus, an army.

An Abstract Noun expresses the quality of an Adjective: as, bonittas, goodness, from bonus, good. Abstract Nouns commonly end in $a, a \delta$, or $d o$.

A Patronymic Noun is generally derived from the name of the father : as, Priamides, the son of Priam. The poets derive them also from some other remarkable person of the family, or from the founder of a nation: as, Aacides, the son, grandson, or one of the descendants of Æacus; Romulida, the Romans, from Romǔlus. Patronymics of men end in des; of women in $i 8, a 8$, and ne. Those in des and ne are of the First Declension, and those in is and as are of the Third.

A Diminutive Noun, or Adjective, expresses a diminution, or lessening of the signification of the word from which it is derived: as, libellus, a little book, from liber; parvülus, very little, from parvus. Diminutives generally end in lus, la, or lum; and the Nouns are usually of the same gender with their primitives.

A Verbal Noun, or Adjective, is derived from a Verb: as, amor, love; amabilis, lovely, from amo. Verbal Nouns commonly end in is, io, or, men, us, or ura; and Adjectives in ax, or ullis.

An Interrogative word is used to ask a question : as, uter, which of the two? quis, who? cur, why? These words, when they do not ask a question, are called Indefinites.

## COMPOUND PRONOUNS.

In the Compounds of quis and qui, quis is sometimes the first, and sometimes the last part of the word compounded; but qui is always the first.

Some of these are twice compounded: as, ecquisnam, ecqucnam, ecquodnam, or ecquidnam, who? unusquisque, unaquceque, unumquodque, or unumquidque, every one; Gen. uniuscujusque, \&ूc. The former is scarcely declined beyond the Nom. Sing. ; and the latter wants the Plural.
All these compounds want the Vocative except quisque, aľ̃quis, quilibet, and quicunque; and have seldom or never queis, but quibus, in the Dative and Ablative Plural.

Idem, the same, is compounded of is and dem, and is thus declined.

The syllables te, ce, pte, cine, are sometimes added to pronouns to increase their demonstrative force; as, tute, hujusce, \&c.

## Pronouns are divided into four Classes:

1. Demonstratives, which point out a person or thing present: ego, tu, sui.
2. Relatives, which refer to something going before; ille, ipse, iste, hic, is, quis, qui.
3. Possessives, which denote possession; meus, tuus, suus, noster, vester.
4. Gentiles or Patrials, which sigaify one's country: nostras, vcstras, cujas.

Quis and cujas are called also Interrogatives.

## VERB.

A Verb is a word which expresses what is affirmed or said of things.

Verbs are declined by Voices, Moods, Tenses, Numbers, and Persons.

They have two Voices: Active ending in 0 ; and Passive ending in or.

They have four Moods: Indicative, Subjunctive,* Imperative, and Infinitive.

They have six Tenses: Present, Imperfect, Perfect Pluperfect, Future, and FuturesPerfect.

They have two Numbers: Singular and Plural.
They have three Persons in each Number.

[^1]There are four Conjugations, or modes of varying Verbs, distinguished by the Infinitive Mood.
The First. Conjugation has $\bar{a}$ long before re of the Infinitive, as amāre; the Second has $\bar{e}$ long, as monēre; the Third has ĕ short, as regĕre ; the Fourth has $\bar{i}$ long, as audire.

There are four Principal Parts of a Verb from which the other Tenses are formed: the Present ending in 0 ; the Perfect in $i$; the Supine in $u m$; and the Infinitive in re; as, Pres. amo; Perf. amāvi; Sup. amātum; Inf. amäre

## FORMATION OF THE TENSES.

From the Present Indicative are formed,

1. The Imperfect Indicative, in the First Conjugation, by the change of $o$ into $\overline{a b a m}$; in the second, of eo into ebam ; and in the Third and Fourth, of $o$ into ébam.

## Different kinds of Verbs.

An Active Verb expresses some action of its nominative: as, amo, I love. When the action implied in the Verb is communicated to some other object, it is called Active Transitive: as, amo patrem, I love my father. When the action does not pass from the agent to any other object, the Verb is called Active Intransitive: as, curro, I run.

A Passive Verb denotes that its nominative is suffering, or is acted upon: as, amor, I am loved.

A Neuter Verb expresses neither action nor suffering, but simply the state, posture, or quality of its nominative: as, palleo, I am pale; sedeo, I sit; gaudeo, I am glad.

A Substantive Verb expresses being or existence. The Substantive Verbs are, sum, I arn ; fio, I am made; forem, I might be ; existo, I exist.

A Deponent Verb has a Passive Termination, with an Active, or Neuter signification: as, loquor, I speak; morior, I die. Verbs are called Deponent because they have laid aside their Passive signification.

A Common Verb has a Passive termination with an Active and Passive signification: as, criminor, I accuse, or I am accused.
A Neuter-Passive Verb is partly Active and partly Passive in termination ; and is Active, Passive, or Neuter in signification: as, audeo, I dare ; fio, I am made; gaudeo, I rejoice.

A Frequentative Verb expresses a frequent repetition of the action, or an increase of the signification denoted by the primitive: as, clamito, I cry frequently, from clamo. Frequentatives are forned from the last Supine, by the change of ätu into ito, in Verbs of the First, and of $u$ into $o$, in Verbs of the other Conjugations. They are all of the First Conjugation, and end in ito, so, xo, and, when Deponent, in or.

An Inceptive Verb expresses the beginning or continued increase of the action or state denoted by the primitive: as, caleo, I am warm ; calesco, I grow warm. Inceptives are formed from the Second Person Singular of the Present Indicative, by adding co: as, caleo, cales, cales-co. They are all of the Third Conjugation, and want both Perfect and Supine. Inceptives are likewise formed from Nouns and Adjectives: as, puerasco, from puer; dulcesco, from dulcis.

A Desiderative Verb expresses a desire to do something. Desideratives are formed from the Future Participle Active, by changing rus into rio, and shortening the penultima: as, cano, I sup; ccenatürus, ccenatürio, I desire to sup. They are all of the Fourth Conjugation, and want both Perfect and Supine, except esiurio, which is regularly conjugated, and partürio, and nupturio, which have the Perfect.

## Participle.

A Participle is a kind of Adjective derived from a Verb, which, in its signification, implies time. When Participles are divested of the idea of time, they admit degrees of Comparison.

There are four Participles; the Present and Imperfect, ending in ns ; the Perfect, in tus, sus, xus ; the Future Active, in rus ; and the Future Passive, in dus. Those which end in $n s$ and rus are generally Active; those in dus are always Passive; and those in tus, sus, xus, are generally Passive, but sometimes Active, or Common, according to the nature of the Verbs from which they come.

Actize Verbs have two Participles, the Present and Future: as, amans, loving; anatūrus, about to love. Active Verbs have no Perfect Participle, but this defect is supplied by quam, with the Pluperfect Subjunctive: as, quum amavisset, when he had loved, or having loved.

Active Intransitive Verbs have frequently three Participles: as, carens, caritūrus, carendus, from careo; and sometimes four: as, viǧ̌lans, vigilātus, vigilatūrus, vigilandus, from viǧ̌lo.

Passive Verbs have two Participles, the Perfect and Future: as, amatus, loved; amandus, to be loved. The Future Participle often supplies the place of a Present Participle Passive.

Neuter Verbs have two Participles: as, sedens, sessürus, from scdeo.
Deponent Verbs of an Active signification have generally four Participles: as, loquens, locūtus, locutūrus, loquendus, from loquor. Those of a Neuter signification have generally three: as, labens, lapsus, lapsürus, from labor. The Perfect Participle of Deponent Verbs has an Active signification, and corresponds to the English Perfect Participle with having: as, locūtus, having spoken.

Common Verbs have generally four Participles: as, crimănans, criminātus, criminatūrus, criminandus, from crimı̆nor. Their Perfect Participle has sometimes an Active, and sometimes a Passive signification: as, criminätus, having accused, or being accused.

Neuter Passive Verbs have generally three Participles: as, gaudens, gavīsus, gavisūrus, from gaudeo.

II. These three Verbs, $\bar{o} d i$, memini, copi, are called Preteritive Verbs, because they have only the Perfect and the Tenses formed from it.

The first two have, in the Perfect, the signification of the Present and Perfect; in the Pluperfect, that of the Imperfect and Pluperfect; and in the Future-Perfect, that of the Future and Future-Perfect.

## Odr, I hate, or I have hated.

Oděrit and Oděrint sometimes supply the place of an Imperative.
In the same manner Memini, I remember, or I have remembered; and Cœepi, I have begun, are conjugated. Memini has memento and mementöte, the Second persons. Singular and Plural of the Imperative; and to Cœepi are assigned the Perfect Participle coptus, begun, or having begun, the Future Participle coeptūrus, and the Supine ccoptu. C'opi has also a Perfect Passive coeptus sum, of the same meaning as the Active, but used with Passive Infinitives.

To these some add Novi, because it frequently has the signification of the Present, I knozo, as well as I have knoron, though it comes from nosco, which is complete.
III. Fari, to speak, and dari, to be given, are not used in the First Person Sing. of the Pres. Indicative and Subjunctive. Of fari, only futur, fabor; the Imperative, fare; the Participles, fans, futus, fan$d u s$; the Gerunds, fandi, and fando ; and the Supine, fatu, are commonly used.

Furĕre, to be mad, wants the First Per. Sing. and the Sec. Per. Plur. of the Pres., and probably all the Future of the Indicative; and the Imperative. It likewise wants the Perfect and Supine.

Of the following Verbs the subjoined persons only are found: apăge, be gone; inftt, he begins; conft, it is done; confiet, confiëret, confiëri; defit, it is wanting, def iet, defīat, defiěri; ovas, thou rejoicest, ovat, ovet, ovāret, ovans, ovätus, ovandi.

## IMPERSONAL VERBS.

Verbs are called Impersonal, which are used only in the Third Person Singular, and which do not admit a person as their Nominative.

They belong to all the Conjugations, and, when literally translated, have the Pronoun it before them.

Verbs, which, in the Active Voice, do not govern the Accusative, are used only impersonally in the Passive: as, persuadētur mihi, I am persuaded; not, persuadeor.

Impersonal Verbs want the Imperative, and generally the Participles, Gerunds, and Supines. The Imperative, when necessary, is supplied by the Present Subjunctive: as, delectet, let him delight.

Impersonal Verbs are applied to any person or number, by putting the words which form the Nominative to regular Verbs, after them, in the cases which they govern: as, delectat me, it delights me, or I delight; delectat te, thou delightest; delectat hominem, the man delights; delectat nos, vos, homines, we, ye, the men delight. Placet
mihi, tibi, homini, it pleases me, thee, the man ; or, I please, thou pleasest, the man pleases, \&c. Pugnatur a me, a te, ab homine, I fight, thou fightest, the man fights, \&c.

ADVERB.
An Adverb is a word added to a Verb, Adjective, or other Adverb, to express the Time, Place, or Manner in which any thing is done.
I. The Adverbs of Time are, nunc, now ; tunc, then ; \&c.
II. The Adverbs of Place are, $u b i$, where? hic, here; \&c.
III. The Adverbs of Manner, Quality, \&c. are, profecto, truly; satis, enough ; itudem, in like manner; \&c.

The Simple, or Primitive Adverbs are few in number: as, non, haud, not ; ibi, there; mox, presently; tunc, then; \&c.

The Derivative Adverbs are numerous, and are formed in the following manner :

1. Adverbs derived from Adjectives of the First and Second Declension generally end in $e$ : as, alte, highly, from altus; lib̆̌re, freely, from liber. They sometimes end in 0 , um, or ter: as, tuto, safely, from tutus ; tantum, so much, from tantus ; dure, and durǐter, hardly, from durus.
2. Adverbs derived from Adjectives of the Third Declension generally end in ter : as, feliciter, happily, from felix. They sometimes end in $e$ : as, facile, easily, from facilis. One ends in 0 : omninno, altogether, from omnis.

The Neuter Gender of Adjectives is often used adverbially : as, recens, recently, for recenter; torva, sternly, for torve.
3. Adverbs derived from Nouns generally end in im, or ǔtus; as, viritim, man by man, from vir; fundžtus, from the ground, from fundus. Many Adverbs in im are derived from Participles: as, sensim, by degrees, from sensus (sentio, I perceive). A few Adverbs in ǐtus are derived from Adjectives: as, antiquǐtus, anciently, from antīquus.
4. Adverbs are formed by Composition in various ways : as, hodie, to-day, from hoc die; sciĭcet, truly, from scire licet ;' quomŏdo, how, from quo modo ; quamobrem, wherefore? from ob quam rem.

Adverbs derived from Adjectives are compared, and are subject to the same irregularities and defects as their Primitives. The Positive generally ends in $e$, or ter ; the Comparative in ius; the Superlative in ime: as,

Pos. Comp. Sup.
Alte, highly ;
Fortiter, lravely : Liběre, freely;
Tuto, safely:

Altius,
Fortius, Liberius,
Tutius,

Altissime.
Fortissime. Liberrime. Tutissime.

The following Adverbs are compared irregularly, like the Adjectives from which they are derived:

| Bene, well; | Melius, | Optime. |
| :---: | :---: | :---: |
| Facille, easily ; | Facilius, | Facillizme. |
| Male, badly ; | Pejus, | Pessume. |
| Multum, much ; | Plus, | Plurĭmum. |
| Parum, little; | Minus, | $\{$ Minime. |
| Prope, near ; | Propius, | Proxime. |

Positive wanting.
Magis, more, maxime; ocius, more swiftly, ocissime; prius sooner, primo, or primum ; potius, rather, potissimum.

Comparative wanting.
Pene, almost, penissǐme; nuper, lately, nuperrime; nove, or novǐter, newoly, novissime; merito, deservedly, meritissimo.

Superlative wanting.
Satis, enough, satius; secus, otherwise, secius.
Two Adverbs not derived from Adjectives are also compared : diu, long, diutius, diutisš̌me ; sape, often, sapius, sapissĭme.

## PREPOSITION.

A Preposition is a word placed before Nouns and Pronouns, to show their relation to other words.
Prepositions are placed before, or govern the Accusative, or Ablative.

There are twenty-eight Prepositions which govern the Accusative:

Ad, to, at.
Apud, at, near.
Ante, before.
Adversus, Adversum, $\}$ against, towards. Contra, against, overagainst.
$\left.\begin{array}{l}\text { Cis, } \\ \text { Citra, }\end{array}\right\}$ on this side.
Citra,
Circa,
Circum, \}about.
Erga, towards.
Extra, without, out of.
Inter, between, among.
Intra, within.

Infra, beneath.
Juxta, nigh to.
Ob , for, on account of.
Propter, for, because of.
Per, by, through.
Præter, beside, except.
Penes, in the power of.
Post, after, since.
Pone, behind.
Secus, by, along.
Secundum, according to.
Supra, above.
Trans, across, on the farther side.
Ultra, beyond.

There are fifteen Prepositions which govern the Ablative:

There are four Prepositions which govern sometimes the Accusative, and sometimes the Ablative.
In, in, into. Sub, under. Super, above. Subter, beneath.
Tenus is placed after its case; and also cum, when joined to $m e, t e$, se, quo, quî, and quibus : as, mecum, \&c. Clam sometimes governs the Accusative: as, Clam patre, or patrem.

Circiter, about ; prope, nigh; usque, as far as ; versus, towards; are Adverbs, and seem to govern the Accusative by means of ad, which is generally understood, but sometimes expressed. So likewise procul, far, which governs the Ablative by means of $a$.

Prepositions are often considered as Adverbs, when the word which they would govern is not expressed.

## Prepositions in Composition.

Prepositions are often prefixed to other words, especially to Verbs, and modify the meaning of the Simple word, by their own.

Ad, to: as, duco, I lead; addūco, I lead to ; fero, I bring; adféro, I bring to.

Per, through, entirely: as perdūco, I lead through; perféro, I carry through; facio, I do; perficio, I do entirely, I finish.

A, ab, abs, from, or arway: as abdūco, I lead away; aufêro, I carry away.

In, in, into, upon, against : as infĕro, I bring in, or into; impōno, I place upon; ruo, I rush; irruo, I rush upon, or against. It sometimes increases the meaning : as, duro, I harden; indüro, I harden much.

The following syllables $a m, d i$, or $d i s, r e, s \varepsilon$, con, are called Inseparable Prepositions, because they are never found except in compound words.

Am-, signifies about, around: as, ambio, I go about, I surround. The $m$ is changed into $n$, before $c, q, f, h:$ as, anceps, that may be taken two ways, doubtful; and $b$ is inserted before a vowel: as, ambio.

Di-, or dis-, asundere, separately : as, didüco, I lead asunder, I separate. It sometimes reverses the meaning: as, facilis, easy ; difficilis,
difficult; fido, I trust; diffido, I distrust. It sometimes increases the meaning: as, cupio, I desire; discupio, I desire much. Dis is used before $c, f, j, p, q, s, t$; and $d i$ before the other consonants.

Re-, back, again, against : as, redūco, I lead back; refěro, I carry back; reľ̌go, I read again; reclāmo, I cry against. It sometimes reverses the meaning: as, tendo, I bend; retendo, I unbend. D is inserted before a vowel, and $h$ : as, redeo, I return.
Se, apart, or aside : as, sedūco, I lead aside, or apart. With Adjectives, it denotes privation: as, cura, care; secürus, free from care, careless.

Con-, (for cum,) together, along with : as, condūco, I lead together, I bring along with me; conféro, I carry together. It sometimes increases the meaning: as, premo, I press; comprimo, I press together, I press much. The $n$ is dropt before a vowel, or $h$; and is changed into $m$, before $b, p, m$ : as, cogo (conăgo,) I drive together; cohceres, a coheir, an heir in participation.

Ne-, and ve-, are also prefixed to words, and have a negative signification: as, fas, justice; nefas, injustice, impiety; scio, I know; nescio, I knuw not, I am ignorant; sanus, healthy ; vesänus, sickly.

## INTERJECTION.

An Interjection is a word which expresses some passion or emotion of the mind: as, oh, hei, heu, ah, alas !

Nouns and Adjectives in the Neuter Gender are sometimes used as Interjections: as, malum, with a mischief! infandum, $\mathbf{O}$ shame! misěrum, O wretched! nefas, O the villany!

## CONJUNCTION.

A Conjunction is a word which connects sentences, or words : as, et, ac, atque, que, and ; etiam, also; \&c.

Some words, as, deinde, thereafter; deň̌que, finally; catěrum, moreover, but; videlicet, to wit; \&c. may be considered either as Adverbs or Conjunctions.

Autem, enim, vero, quoque, quidem, are never put first in a clause or sentence. Que, ve, and ne, are always annexed to some other word.

## SY•NTAX.

Syntax is the correct arrangement of words in a sentence, and consists of Concord and Government.

Soncord is when one word agrees with another in Gener, Number, Case, or Person.

Government is when one word requires another to be put in a certain Case or Mood.

## General Principles.

1. In every sentence there must be a Verb and a Nominative expressed or understood.
2. Every Adjective must have a Substantive expressed or understood.
3. All the Cases of Nouns, except the Nominative and Vocative, must be governed by some other word.
4. The Genitive is governed by a Noun expressed or understood.
5. The Dative is governed by Adjectives and Verbs.
6. The Accusative is governed by an Active Verb, or by a Preposition, or is placed before the Infinitive.
7. The Vocative stands by itself, or has an Interjection joined with it.
8. The Ablative is governed by a Preposition expressed or understood.
9. The Infinitive is governed by a Verb or Adjective expressed or understnod.

## CONCORD.

Rule I.-An Adjective agrees with its Substantive in Gender, Number, and Case: as,

Vir bonus, a good man.
Femina casta, a chaste woman.
Dulce pomum, a sweet apple.
Note 1.-The Substantive negotium is often understood to an Ad. jective in the Neuter Gender: as, triste, supply negotium.

Note 2.-The Infinitive sometimes supplies the place of a Sub. stantive : as, Scire tuum. Pers.

Rule II.-A Verb agrees with its Nominative in Number and Person : as,

Ego lego, I read.
Tu scribis, you write.
Praceptor docet, the master teaches.
Note 1. -The Nominative of the Pronouns is expressed only when some particular distinction of the Person is necessary.

Note 2.-An Infinitive, or part of a sentence, often supplies the place of a Nominative of the Third Person: as, Mentiri est turpe; Vacare culpa est magnum solatium.

Note 3.-A Collective Noun, though Singular, may be joined with s Verb in the Plural: as, Multitudo convenerant.

Rule III.-Substantive Verbs, Passive Verbs of Naming, and Verbs of Gesture, have a Nominative both before and after them, belonging to the same thing: as,

Ego sum discipülus, I am a scholar. Tu vocäris Joannes, you are named John. Illa incēdit regina, she walks as a queetı.
Or-Any Verb may have the same Case after it as before it, when both words refer to the same thing.

Note. - When a Verb comes between two Nominatives of different numbers, it generally agrees with the first : as, Ossa fiunt lapis. Ov.

Rule IV.-The Infinitive Mood has an Accusative before it: as,

Gaudeo te valerre, I am glad that you are well.
Note.-The Accusative of the Pronouns is often understood; and esse, or fuisse, is frequently omitted after Participles. -

Rule V.-Esse has the same Case after it that it has before it: as,
Petrus cupit esse vir doctus, Peter desires to be a learned, inan. Scio Petrum esse virum doctum, I know that Peter is a learned man.
Or-The Infinitive of a Substantive Verb, of a Passive Verb of Naming, and of a Verb of Gesture, takes the same Case after it that it has before it.

Note. - When the Dative precedes the Inlinitive, the Noun which follows is sometimes put in the Accusative: as, Licet omnibus esse bonos; sup. eos.

Rule VI.-The Relative Qui, que, quod, agrees with its Antecedent in Gender, Number, and Person: as,
Vir sapit qui pauca loquǐtur, the man is wise who speaks little. Ego qui scribo, I who write.
Note 1.-The Antecedent is the Noun going before the Relative and to which it refers. The Relative is properly an Adjective, and agrees with the Antecedent, which is again understood to it : as, Vir sapit qui (vir) puuca loquitur, the man is wise which (man), \&c.

Note 2.-Part of a sentence sometimes forms the Antecedent, in which case the Relative must be in the Neuter Gender: as, In tempore veni quod rerum omnium est primum. Ter.

Rule VII. -If no Nominative come between the Rela
tive and the Verb, the Relative shall be the Nominative to the Verb: as,

Praceptor qui docet, the master who teaches.

- Rule VIII.-If a Nominative come between the Relative and the Verb, the Relative is governed by the Verb, Noun, or Adjective following, or by the Preposition which goes before it: as,

Deus quem colimus, God whom we worship. Cujus munĕre vivimus, by whose gift we live.
Note.-Words of relative quantity and quality, as, qualis, quantus, quotus, are often construed as the Relative: thus, Tanta multitudo quantam capit urbs nostra. Cic.

Rule IX.-Two or more Substantives Singular, connected by the Conjunctions, et, ac, atque, \&c. generally have a Verb, Adjective, or Relative Plural: as,
Petrus et Joannes qui sunt docti, Peter and John who are learned.
Note 1.-A Conjunction is not always necessary: as, Dum atas, metus, magister prohibebant. Ter.

Note 2.-If the Substantives be of different Genders, and signify Persons, the Adjective is Masculine, agreeing with homines, understood. But, if the Substantives signify things without life, the Adjective is Neuter, agreeing with negotia, understood.

Note 3.-When the Nominatives are of different Persons, the Verb agrees with the First rather than the Second, and with the Second rather than the Third: as, Si tu et Tullia valetis, ego et Cicero valemus. Cic.

Rule X.-Substantives signifying the same thing agree in Case: as,

Cicero orätor, Cicero the orator.
Urbs Edinburgum, the city Edinburgh.
Note.-A sentence, or clause, may supply the place of one of the Substantives: as, Cogitet oratorem institui, rem arduam. Quint.

## GOVERNMENT.

Government of Substantives.
Rule XI.-One Substantive governs another, signifying a different thing, in the Genitive : as,

Amor Dei, the love of God.
Lex natüre, the law of nature.

Note 1.-The Genitive is sometimes changed into the Dative: as, Urbi pater est, urbique maritus. Luc.

Note 2.-The governing Substantive is sometinies understood : as, Ubi ad Dianæ veneris. Ter. Sup. templum, or adem.

Rule XII. - If the latter of two Substantives have an Adjective signifying Praise, Dispraise, or any sort of Distinction, joined with it, it may be put in the Genitive or Ablative: as,
Vir summa prudentic, or summâ prudentia, a man of great wisdom.
l'uer proba indŏlis, or probâ indŏle, a boy of a good disposition.
Note.-The latter Substantive must denote a part or property of the former, otherwise it does not belong to this Rule.

Rule XIII.-An Adjective in the Neuter Gender, without a Substantive, governs the Genitive: as,

> Multum pecunia, much money.
> Quid rei est? what is the matter?

Note 1.-The Adjectives which govern the Genitive like Substan tives generally signify quantity: as, multum, plus, tantum, \&cc. To these add the Pronouns, id, hoc, quid, and its compounds. Quid and plus always govern the Genitive. Quod and its compounds agree in Case with their Substantives.

Note 2.-Plural Adjectives in the Neuter Gender also govern the Genitive: as, Angusta viarum. Virg.

* Rule XIII.-Opus and Usus, signifying need, ga vern the Ablative of the thing wanted: as,

Auctoritūte tuá nobis opus est, we have need of your authority. Nunc viribus usus (est vobis), now you have need of strength.

Note.-Opus and usus sometimes govern the Genitive: as, Lectio. nis opus est. Quint.

## Government of Adjectives.

Rule XIV.-Verbal Adjectives, or such as signify an Affection of the Mind, govern the Genitive : as,

> Avidus gloria, desirous of glory. Ignärus fraudis, ignorant of fraud. Memor beneficiōrum, mindful of favours.

To this Rule belong Verbal Adjectives in ax, ns, and tus; Adjectives denoting Affection; as, Desire and Disdain; Knowledge and Ignorance; Innocence and Guilt.

Rule XV.-Partitives, and words placed Partitively, Comparatives, Superlatives, Interrogatives, and some Numerals, govern the Genitive Plural: as,

Aliquis philosophörum, some one of the philosophers. Senior fratrum, the elder of the brothers.
Quis nostrûm, which of us.
A Partitive is a word which signifies a part of any number of persons or things, in contradistinction to the whole.

Note 1.-Partitives, \&c. agree in Gender with the Substantives which they govern : as, Nulla sororum. But if there be two Substantives of different Genders, the Partitives, \& c. generally agree with the former: as, Indus fluminum maximus. Cic.

Note 2.-Partitives, \&c. govern the Genitive Singular of Collective Nouns : as, Prastantissimus nostre civitatis. Crc. Sup. vir.

Rule XVI.-Adjectives signifying Profit or Disprofit, Likeness or Unlikeness, govern the Dative: as,

Utilis bello, profitable for war. Similis patri, like his father.
Or-Any Adjective may govern the Dative in Latin, which has to or for after it in English.

To this Rule also belong Adjectives signifying Pleasure or Pain; Friendship or Hatred ; Clearness or Obscurity ; Nearness ; Ease or Difficulty; Equality or Inequality; and several compounded with con: as, cognātus, \&c.

Note 1.-Some of these Adjectives govern also the Genitive: as, amīcus, inimìcus, socius, vicīnus, par, aquālis, simǔlis, commūnis, proprius, \&̊.

Note 2.-Adjectives signifying Motion or Tendency to a thing, take after them the Accusative with ad, rather than the Dative: as, proclivus, pronus, propensus, velox, celer, tardus, piger, \&q. : as, Piger ad penas. Ov.

Note 3.-Adjectives signifying Usefulness, Fitness, and the contrary, often take the Accusative with ad : as, Utilis ad nullam rem. Cic.

Note 4.-Propior and proximus take after them the Dative, or the Accusative governed by ad understood: as, Propius vero. Liv. Proximus Pompeium. Cic. Sup. ad.

Rule XVII.-Verbal Adjectives in bilis and dus govern the Dative: as,

Amandus, or amabilis omnibus, to be beloved by all men.
Rule XVIII.-Nouns denoting Measure are put in the Accusative: as,

Columna sexaginta pedes alta, a pillar sixty feet high.

Note 1.-The names of Measure are digǐtus, palmus, pes, cub̌tus, ulna, passus, stadium.

Note 2.-The word denoting Measure is sometimes put in the $\mathbf{A b}$ lative: as, Fossam sex cubitis altam. Liv. The difference of Mea. sure is always put in the Ablative : as, Turris est sex pedibus altior quam murus. To which may be referred, tanto, quanto, hoc, eo, quo, multo, paulo, \&c.

Rule XIX.-The Comparative Degree governs the Ablative of the Object with which any thing is compared: as,

Dulcior melle, sweeter than honey.
Prastantior auro, better than gold.
Note.-When the Comparative is followed by quam, the objects compared are put in the same Case: as, Dulcior quam mel; Præstantior quam aurum. - Additional Rules for the Construction of Qui and Quum.

In the application of the following Rules, it is necessary to distinguish between the Subjunctive and Potential Mood. When the meaning is contingent, the Potential Mood must be employed; and, in all such examples, it deserves particular attention, that the form of

[^4]the $V$ erb is not affected by the relative, or any antecedent partiole, but is strictly potential, the sense itself requiring that form. Thus, if we say, "I read, that I may learn," Lego ut discam-" He sent men, who might tell the king," Misit homines, qui regi nunciarentthe two Verbs, Discam and Nunciarent, are not each subjoined to any preceding word, as its regimen; but are to be considered as in the Potential Mood, the sentiment to be expressed clearly demanding that form of the Verb. But, when this form is used, not because the sentiment requires it, as being contingent or conditional, but because the Verb is suljoined to some Adverb, Conjunction, or indefinite term, which requires that form, it is then properly the Subjunctive Mood. If I say, "He was so cruel a tyrant, that all men feared him," Tyrannus tam crudelis erat, ut omnes eum metucrent-"You err, who think," Erras, qui censeas-the Verbs Metuerent and Censeas must be considered as Subjunctive; for, were they not subjoined to $U t$ and Qui, they would be put in the Indicative form, the sense being assertive and unconditional.

Rule 1.-Qui is uniformly joined to the Subjunctive Mood when the relative clause does not express any sentiment of the author's, but refers it to the person or persons of whom he is speaking : as,

Socrates dicere solebat, omnes in eo, quod scirent, satis esse eloquentes. Cric.

Obs. 1.-Or, Qui is joined to the Subjunctive Mood when the dis. course is oblique or indirect. In oblique narration, the only Moods admissible are, the Infinitive and Subjunctive: and, as the relative is never employed except in the secondary and subordinate members of a sentence, it must always, in oblique statements, be followed by the Subjunctive.

Obs. 2.-In the same manner Ubi for in quo loco, Quo for ad quem locum, and Unde for e quo loco, taken relatively, and not expressing an observation of the author's, or an object of his knowledge, govern the Subjunctive Mood :' as, Cognovit, non longe ex eo loco oppidum Cassivellauni abesse, quo, satis magnus hominum pecorisque numerus convenerit. Ces.

Obs. 3.-The same principle extends also to the Conjunctions quia, quam, quum, quod, quando, atque, and other such relative words: as, Eos inter se, quia nemo unus satis dignus regno visus sit, partes regni rapuisse. Liv.

Rule II.-Qui is joined to the Subjunctive Mood, when the relative clause expresses the motive, reason, or cause of the action or event : as,

Male fecit Hannibal, qui Capuæ hiemárit, Hannibal did wrong in wintering, or because he wintered, at Capua.

Rule III.-Qui is joined to the Subjunctive Mood, when it is equivalent to quanquam, or etsi is, si, modo, or dummodo is: as,

Scilicet etiam illum, qui libertatem publicam nollet, tam projectæ servientium patentix tædebat. TAC.

Rule IV.-Qui is joined to the Subjunctive Mood when it follows an Interrogative, Negative, or Indefinite word: as,

Quis est enim, cui non perspicua sint illa? Crc.
Obs. 1.-This rule takes effect only when the antecedent and relative clauses refer to the same subject, and logically express but one subject and one attribute.

Ols. 2.-The following are the most common forms of expression referred to in this Rule: Quis est? Quantus est \% Ecquis est ? An quisquam est $\%$ Quotusquisque est ? \& c. Nemo est, Nullus est, Nihil est, Non quisquam est, Nego esse quenquam, Vix ullus est, \&c.

Obs. 3.-This rule is applicable to those cases only in which the interrogation is equivalent to an affirmation or negation. When the sentence implies a question, put for the sake of information, the relative takes the Indicative Mood : as, Quis hic est, qui operto capite Esculapium salutat ${ }^{2}$ Plaut. Quis est, qui salutet? would signify, "Who is there that salutes ?" implying " Nobody salutes."

Rule V.-Qui is very generally joined to the Subjunctive Mood, when a periphrasis with the Verb Sum is employed, instead of simply the Nominative with the principal Verb: as,

Sunt, qui dicant, "There are persons, who say," instead of Nonnulli dicunt, "Some say."

Obs. 1.-This Rule, like the preceding, takes effect only when the relative clause forms the predicate of the sentence.

Obs. 2.-The periphrastic form of expression is employed with other Verbs besides Sum : as, Reperio, invenio, existo, exorior : also, tempus fuit, tempus veniet, \&c. adest, prosto sunt, \&c.

Rule VI.-Qui is joined to the Subjunctive Mood, when it is used for ut ego, ut tu, ut ille, ut nos, ut vos, ut illi, through all their cases : as,

At ea fuit legatio Octavii, in quâ periculi suspicio non subesset. Cic.
Rule VII.-Qui is joined to the Subjunctive Mood after Solus and Unus, when they are employed to restrict to a single person the qualities implied in the relative clause: as,

Solus hic homo est, qui sciat divinitus. Plaut.

## Quum-a Conjunction.

Rule I.-Quum taken for quoniam, or quandoquidem, "since," is very generally joined to the Subjunctive Mood: as, "Quum Athenas sis profectus." Crc.

Rule II.-Quum taken for quod, "because," is generally joined to the Indicative Mood : as, Ego redigam vos in gratiam hoc fretus, quum e medio excessit. Тzる.

Rule" III.- Quum taken for ctsi, "although," is uniformly juised to the Subjunctive Mood: as, Cui quum Cato et Caniniusintercessissent, tamen est perscripta. Cic.
Quum-an Adverb.

Rule I.-Quum taken for quoties, or quandocunque, "as often as," or "whenever," is joined to the Indicative Mood: as, Quum prospero ejus flatu utimur, ad exitus pervehimur optatos, et quum reflavit, affligimur. Cic.

Rule II.-Quum taken for quando, "at the time when," or " at which time," is joined to the Indicative Mood: as, Ne stridorem quidem serræ tunc audiunt, quum acuitur; aut grunnitum quum jugulatur sus. Cic.

Rule III.-Quium is joined to the Indicative Mood, when it is used to express the point of time at which an action or state commenced, conceived to be continued to the present period: as, Jam anni prope quadraginta sunt, quum hoc probatur. Cic.

Rule IV.-Quum is joined to the Indicative Mood when it signifies " as soon as," and is emphatically used with primum, denoting an action or event in close succession to another: as, Quum ad nos allatum est de temeritate eorum, graviter commotus sum. Cic. Quum primum Romam veni. Cic.

Rule V.-Quum is joined to the Subjunctive Mood, when it is taken for postquam, "after," denoting simply the posteriority of one event to another, but not implying close succession : as, Hæc quum cnimadvertisset, vehementer eos incusavit. Cess.
Rule VI.-Quum, when joined to a secondary clause, expressing a past action or event as in progression, to which another action or event, in the primary clause, is expressed as contemporary, is joined to the Subjunctive Mood: as, Quum civitas armis jus suum exsequi conaretur, Orgetorix mortuus est. Ces.

Obs.-It is necessary to observe, that the preceding rules for joining Quum with the Indicative Mood, do not take place in the two following cases: lst, If the clause be oblique-we say, for example, "Tempus fuit, quum homines vagabantur," Crc. but, "Scio tempus fuisse, quum homines vagarentur." 2dly, When any thing doubtful, contingent, or fortuitous, is implied, the sense requires the Po. tential Mood: as, "Sed tu omnia consilia differebas in id tempus, quum sciremus." Cic. "When we should know." It must be observed also, that though usage be very generally conformable to these rules, it is not universally so. Cicero says, "Tempus fuit, quum homines vagabantur." Varro, in a sentiment precisely similar, saya, "Tempus fuit, quum homines rura colerent."

## VERBS.

## General Rules for Compound Verbs.

1. Compound Verbs form the Perfect and Supine in the same manner as Simple Verbs: as, amo, amãvi, amãtum; red-ămo, red_amävi, red-amãtum.
2. When the Simple Verbs double the first syllable in the Perfect, the Compounds drop the former Syllable: as, pello, pepǔli; re-pello, re-pǔli. Except the Compounds of do, sto, disco, posco, and some of the Compounds of curro. See p. 122.
3. Compound Verbs which change $a$ of the Present into $i$, have $e$ in the Supine: as, facio: per-ficio, per-féci, per-fectum. Except Verbs ending in do, go, with displiceo, and the Compounds of habeo, salio, and statuo.
4. Verbs which are defective in the Perfect likewise want the Supine. Cico,-citum, ciēre, to stir up, is probably the only exception.

## FIRST CONJUGATION.

Rule.-Verbs of the First Conjugation have àvi in the Perfect, and ätum in the Supine: as,

| Amo, | amāvi, | amātum, | to love. |
| :--- | :--- | :--- | :--- |
| Muto, | mutāvi, | mutātum, | to change. |

## EXCEPTIONS.

See p. 107, Rule 2.
${ }^{3}$ The Compounds of sto have stiťti in the Perfect, and stātum in the Supine: as, consto, consť̄ti, constätum, to stand together. Some of the Compounds are said to have also stĭlum in the Supine : as, prasto, prastǐti, prasť̌tum, or prastātum, to stand before, to excel; but the Future Participle is always formed from stätum. Adsto, to stand by, prosto, to stand, to be sold, and resto, to remain over and above, have no Supine. Antesto, to stand before; circumsto, to stand round; intersto, to stand between; and supersto, to stand over, have stěti, in the Perfect, and want the Supine. Disto, to be distant, and substo, to stand under, have neither Perfect nor Supine. See p. 107, Rule 2.

- Discrěpo, to differ, and incrěpo, to chide, have sometimes āvi and $\bar{a} t u m$, as well as $u i$ and $\begin{gathered}\text { tum } \\ \text { tum }\end{gathered}$. Incrěpo has seldom the latter form.
${ }^{10}$ Emǐco, to shine forth, has emicui, emicātum; and dimǐco, to fight, has dimicāvi, rarely dimicui, dinicātum.

${ }^{13}$ Eněco, to kill, and interněco, to destroy, have more frequently $u i$ and ectum; the Participle of eněco is usually enectus.

## DEPONENT AND COMMON VERBS.

Rule.-Deponent and Common Verbs form the Perfect Participle in the same manner as if the Active Voice existed. See pages 51 and 52.

Note.-All Deponent Verbs seem to have been originally Passives. Hence there are many Verbs which, though found in the Active Voice, are used deponently in the Passive; others, under the naine of Common Verbs, have become obsolete in the Active, and, in the Passive, are employed either as Deponents or Passives; and many which have laid aside their Passive signification in the other Tenses, still retain it in the Perfect Participle.

## II. RULES FOR THE QUANTITY OF SYLLABLES.

That part of Grammar which treats of the quantity of Syllables, and the Construction of Verse, is called Prosody.
By the Quantity of a Syllable is meant, the time occupied in pronouncing it.

Syllables are either long or short. A long syllable occupies, in pronouncing, double the time which is assigned to a short syllable. Long syllables are marked thus, ${ }^{-}$: as, Dìdō : short syllables are marked thus, ": as, pătěr.

## I. GENERAL RULES.

1. Vocalem breviant aliâ subeunte Latini.

A vowel before another vowel or a diphthong, in words of Latin origin, is short : as, dĕus, pŭer, dĕ̃ ; or before $h$ and a vowel : as, trăho, măhi, nh̆hil; because $h$, in verse, is considered merely as a breathing.
2. Ni capit $r$, fio produc: et nomina quintæ $E$ servant longum, si præsit $i$, ceu speciēi. Anceps ius erit patrio: sed protrahe alius, Alterìus brevia tantùm : commune sit ohe. Pompëi Cäi produc, conformia jungens. Dianam varia: longa äër, dīus et ē̄heu, Et patrius primæ cum sese solvit in $\bar{a} i$.
Exc. The $i$ is long in fio when not followed by $r$ : as, fiebam :
in the other Tenses it is short: as, fierem. The $e$ in the penult of the Gen. and Dat. of Nouns of the Fifth Declension, when preceded by $i$, is long : as, specieiti.* Genitives in ius have the $i$ long in prose, but commont in verse: as, unius : but alius is always long, and altěrius is always short. Proper names in ezuus, and aïus : as, Pompēius, Cäius, with Vocatives of the same kind, are long; also the old form of the Genitive of the First Declension : as, terrāi ; likewise $\bar{a} e r$, dīus, and $\bar{e} h e u$.
Ohe, Diana and Io (a Proper Name) have the first syllable common; but io (the interjection) follows the genesal rule.
3. Hic Græci variant, nec certâ lege tenentur.

The Quantity of a Vowel before another vowel or a diphthong,

* All Nouns of the Fifth Declension have the $e$ iong in the penult of the Genitive Singular, except fides and res,-in which it is common. and spes, in which it is always short.
$\dagger$ The quantity of a syllable is said to be common, or doubtful, when it is found sometimes long, and sometimes short.
in words derived from the Greek, cannot be reduced to any precise Rule. It is short in some words : as, Danđđe, iděa; and long in others: as, Lycāon, Cytherēa.

4. Si postponatur vocali consona bina, Aut duplex, longa est positu: sin utraque vocem Incipiat, rarò præeunti est ultima longa.
A Vowel before two Consonants, either in the same, or in consecutive words, or before a double Consonant, is long : as, bellum, discors, axis : and in this case the vowel is said to be long by Position. The Double Consonants are X, Z, and $J$, except in Compound words: as, büjugus, quadř̌jugus.
The Latin poets after the time of Lucretius, seldom, if ever, allowed a vowel in the end of a word to remain short, when followed by a word beginning with $s c, s p, s q, s t$, though from the few examples which occur, they appear to have carefully avoided such a collocation. The quantity of a vowel in the end of a word is not affected by any other combination of consonants, or by a double consonant in the beginning of the following word.
5. Si mutæ liquida est subjuncta in syllabâ eâdem,

Quae brevis antevenit vocalis, redditur anceps.
Hanc tamen in prosâ semper breviare memento.
Sunt $l, r$, liquidæ, queis rarò jungimus $m, n$.
A Vowel naturally short, when followed by a Mute* and either of the Liquids, $l, r$, in the same syllable, is common in verse, but always short in prose: as, agris, pharetra, volucris. In a few words taken immediately from the Greek, a vowel is allowed to remain short before a Mute, and either of the two other Liquids, $m, n$ : as, cy̆cnus, Pröcne.
If the Liquid stand before the Mute, or belong to a different syllable, the preceding vowel is necessarily long: as, ärte, $\bar{a} b-l u o$, öb-ruo, quamōb-rem.
A Vowel naturally long is never made short before a Mute and a Liquid: as, mātris, salūbris, from māter, salūber.
6. Vocalem efficiet semper Contractio longam.

Contracted Syllables are long: as, cogo, for coăgo; alius, for aliius ; sis, for si vis; tilīcen, for tibiicen, or tibiacen.
7. Diphthongum produc in Græcis atque Latinis :

In Grecis semper: at Pres composta sequente Vocali brevia: veluti praĕit atque praĕustus.

* There are ten Mutes: b, c, d, f, j, k, p, q, t, v; and four Liquids : $1, r, m, n$, of which the first two only ecme within the limits of this rule, excent in Greek words.

Diphthongs are long in Latin and Greek words: as, Cesar, aurum, fenus ; Eubca, /Encas, Harpyia.
Exc. The Preposition pra, when prefixed to a word beginning with a Vowel, is short : as, pračeo, praěustus.

## II. SPECIAL RULES.

## First and Middle Syllables.

8. Derivata tenent mensuram primigenorum :

Orta tamen brevibus, suspīcio, règ gula, sēdes,
Sēcius, hūmanus, pēnuria, mōbilis, hūmor, Jümentum, fōmes, primam producere gaudent. Corripiunt sed ărista, vădum, sŏpor atque lŭcerna, Duxque dŭcis, stabilisque, fĭdes, dǐtioque, quăsillus,
Nata licet longis; quæ pluraque suggeret usus.
Derivative words usually retain the quantity of the words from which they are formed: as, ămicus, păvidus, from ămo, păveo; māternus, nätivus, from māter, nātus; lĕgam, lēgeram, from lygo, lēgi; virgineus, sanguĭneus, from virginis and sangǔ̆is.
Exc. 1. The following Derivatives are long, although the corresponding syllables in their Primitives are short: suspācio from susp̌̌cor, rēgula from rĕgo, sēdes from sědeo, sēcius from sěcus, hümanus from hŏmo, pēnuria from pěnus, möbilis from mŏveo, hūmor from hŭmus, jūmentum from jŭvo, fömes from $f$ ŏveo.
Exc. 2. The following are short, from Primitives which have the corresponding syllables long: ărista from āreo, vădum from vädo, sŏpor from söpio, lŭcerna from lūceo, dŭcis from ${ }^{-}$ dūco, stăbilis from stātum, füles from fĩdo, ditio from dītis, quăsillus from quălus.
Note 1.—Mōbilis, jūmentum, and fōmes are necessarily long, being derived from the Supines, mötum, jūtum, and fōtum; these Supines being probably lengthened by contraction.

Note 2. The following Derivative words, which are of frequent occurrence, also differ in quantity from their Primitives: jūgerum from $j u$ ŭgum, lāterna from lăteo, mācero from măcer, mölestus from möles, nơta and nŏto from nōtus, perfídus from fidus, tēgula from $t$ ťgo, vŏco from vox, vöcis.
9. Simplicium servant legem composta suorum, Quamvis diphthongus vel vocalis varietur.
At breviant nihilum, cum pejĕro, dejěro, nec non
Veridĭcus, sociis junctis, et semisơpitus.
Cognĭtus his addes, velut agnĭtus, innŭbus, atque
Pronǔbus : at longis ambitus mobile junges,
Imbēcillus item: sed connubium variabis.

Compounds usually retain the quantity of the Simple words of which they are composed: as, perlĕgo, invǐdeo, from lĕgo, vì. deo; perlëgi, invīdi, from lēgi, vīdi; impröbus, perjūrus, from $p r \nsucc b u s, j u \bar{r} i s$.
The quantity of the simple word is not altered by the change of a vowel or diphthong in the Compound: as, conč̌do, irrĭtus, from eădo, rătus ; concīdo, inĭquus, from ceedo, aquus.
Exc. The following Compounds differ in quantity from the Simple words : nihillum from ne and hïlum, pejěro and dejërn from jüro, veridicus and other Adjectives in dǐcus from dīco, semisð̛pitus from söpitus, cognŭtus and agnĭtus from nōtus, innŭbus and pronŭbus from nūbo, imbēcillus from lăculus, ambītus from štun. Connubium from $n \bar{u} b o$ has the second syllable common.
10. Quam disjuncta dabat mensuram præpositura, Juncta tenet: subiens illam nisi litera mutet.
Prepositions, when compounded with other words, retain their original quantity: as, àmitto, dēduco; ăboleo, pěrimo, because $\bar{a}$ and $d \bar{e}$ are long, and $\breve{a} b$ and pěr short. Trans frequently drops the last two letters in composition, but retains its proper quantity: as, trăduco, for transduco.
Prepositions ending in a Vowel become short, when prefixed to words which begin with a vowel : as, dĕosculor, prǒhibeo. Ob sometimes drops the $b$ before a Consonant, in which case the $o$ remains short: as, ðmitto, for obmitto. The Prepositions which end in a Consonant become long by Position, when placed before another Consonant : as, ädmitto.
1:. Est PRO breve in Græcis, PRO longum rite Latinis. At rape quæ fundus, fugio, neptisque, neposque,
Et festum, fari, fateor, fanumque creârunt.
Hisce prơfecto addes, pariterque prŏcella, prŏtervus,
Atque propago genus; prōpago protrahe vitis.
Propino varia, verbum propago, profundo:
Cum pello, curo genitis, Proserpina junge.
The Preposition pro is short in Greek words : as, Prormetheus, prologus, propheta:* it is generally long in Latin words: as, prödo, prömitto, prōveho.
Exc. 1. In the following Latin words pro is short; prơfundus, prơfugio, prơfugus, prŏneptis, prŏnepos, prơfestus, prŏfari, pry̌fteor, prơfanus, prơfano, prŏfecto, prŏficiscor, prơfectus, prŏcella, prötervus, and pröpago when it signifies a race or lineage; but when it signifies a vine-stock, the first syllable is long.

[^14]E.xc. 2. In the following words prö is common: propino, pro. pago (a Verb), profundo, propello, propulso, procuro, and Proserpina, though not a Compound.
Note.-The rule here given for the quantity of pro in profundo, propello, and procuro, is not supported by sufficient authority: in the first, pro is always found short in the best writers; and in the other two, it is always long. The first syllable of propago is common both in the noun and verb. The distinction mentioned above is not observed by the best writers.
12. SE produc et DI , præter dirimo, atque dǐsertus.

Est RE breve: at viduum personis protrahe rēfert.
The Inseparable Prepositions se and di are long in Compound words : as, sēparo, dīvello: except in dĭrimo and džsertus.
$R e$ is short : as, rěmitto; also in verbs beginning with a vowel, where $d$ is inserted for the sake of euphony: as, rědamo. Re in the Impersonal Verb refert, is long; but is here to be considered not as the inseparable Preposition, but as the dative or ablative of res.
$R e$, though naturally short, is made long in the following com. pound words: rēčido, rēduco, rèligio, reèligiosus, rèliquia, rèlatum, rēmotum; it is always long in the three Preterites, rēperit, rēpulit, and rètulit.
The prefix ve, signifying small, is long in composition, and ne (negative) and si, which are long as monosyllables, are short : as, vēsanus, nĕfas, š̌quidem.
13. Pars si componens fini prior $i$ vel $o$ donat,

Sit breve : vaticinor monstraverit Arctơphylaxque.
$I$ and $\sigma$ in the end of the first component part of a word are generally short : as, omnĭpotens, hŏdie. The exceptions are contained in the following rule:
14. I quibus est flexu mutabile, jungito longis, Quæque queunt sensu salvo divellier, addens
De quibus aut Crasis aliquid vel Syncopa tollit.
Idem masculeum produc, et ubique, et ibidem;
Huic dein agglomerans turbæ composta diei.
His intro, retro, controque, et quando creata
(Quandŏquidem excepto,) bene junxeris, atque aliöquin.
Quæque per o magnum scribuntur nomina Graiis.
The following words have $i$ and $o$ long in the end of the first component part :

1. Those in which $\boldsymbol{i}$ is the Termination of a case: as, quīdam, tantīdem, reīpublicce, qual̄̄cunque.
2. Those in which the component parts may be separated without injuring the sense: as, ludïmagister, lucrīfacio, sīquis; which are also written, ludi masister, lucri facio, si quis,
3. Those in which a syllable has been dropped by Crasis or Syncope : as, tibīcen for tibiacen, bīga for bijuga, scilicet for scirelicet.
4. Idem has $i$ long in the Nom. and Voc. Singular Masc., but short in the Neuter. $I$ is long in ubīque and ibūdem, but short in ub̌̌vis, and doubtful in ubicunque.
5. The compounds of dies : as, bīduum, meridies. But quotidie and quotidianus have the second syllable sometimes short.
6. Latin words compounded with intro, retro, contro and quando: as, intrōduco, retrōduco, contrōversia, quandöque; likewise aliöquin, coteröquin, utröbique.
7. Words transplanted from the Greek in which o represents $\omega$ : as, geömetra, Minötaurus, lagōpus.
Note.-The two preceding rules would have been more simple had the principle stated in Rule 9 been kept in view, that words when joined in composition retain their natural quantity, unless they are modified by contraction or otherwise. Thus the $i$ in quīdam, tantidem, ludïmagister, sìquis, \&ूc. is long, because it is long in qui, tanti, ludi, si, \&ूc. In bìduum, ìdem, scilicet, the first syllable is long by contraction. The same principle applies to some words which have o long in the end of the first component part : as, aliöquin, coeteröquin, utröbique, because it is long in alī̄, caterō and utrō. So likewise in quäre, quāpropter, \&्\&c., the $a$ is long because it is long in quā. In omnüpotens, semǐvir, \&qco, the $s$ of omnis and semis is dropped before the consonants, and the $i$ consequently remains short.

The following facts concerning the Compounds of facio are taken from Professor Ramsay's excellent work on Latin Prosody: In caľ̌facio, cale̛facto, laběfacio, labĕfacto, maděfacio, pavĕfacio, rubと̆facio, stupĕfacio, tremĕfacio, tuměfacio, the e is uniformly short. Patefacio has the second syllable generally short; it is lengthened by Lucretius in two passages, of which the one is a disputed reading. Tepefacio, with one exception, has the e always short; in liquefacio it is generally short. Putrefucio, which is an unusual word, appears to have the $e$ common. Expergèfacta and confervëfacit, are found with the $e$ long, but not in poets of the Augustan age.

## Perfects and Supines of Verbs.

15. Præterita assumunt primam dissyllaba longam. Tolle bibbit, scǐdit, et füdit, ac tǔlitt, ortaque do, sto.

18. Cætera præsentis mensuram verba reservant.

Excipe sed pŏsui, pŏsitum, gěnui, gěnitumque,

Exc. Pŏsui, pŏsitum, from pōno; gěnui, ǧ̌nitum, from gìgno: sollutum, and vŏlutum, from solvo, and volvo, have the first syllable short, though the corresponding syllable in the Present is long.

Supines of more than two syllables in ātum, ètum, and $\bar{u} t u m$, have the penult long: as, amãtum, delētum, minütum. So also Supines in ìtum from Preterites in ivi : as cupīvi, cupītum, (except eo and its compounds, See page 59); but all other Supines in tum have the penult short: as, monui, monǐtum; abolëvi, abolĭtum. Recenseo, has recensītum.

A in the end of words declined by cases, i. e. in Nouns, and Adjectives, is short : as, musŭ, lampad̆̆, Tydĕ̆, bonă, eă.
Exc. The Ablative of Nouns and Adjectives of the First Declension, and the Vocative of Greek Nouns in as of the First and Third Declensions are long: as, Musā, AEneă, Atlā.
Note.-Vocatives in $a$ of Greek Nouns in tes are short: as, Eetă, Drestu. Those from Nominatives in es are sometimes, though rarely, found long: as, Anchisā, AFacidā. But these more commonly follow the general Rule.

A in the end of words not declined by cases, i. c. in Verbs, and indeclinable words, is long: as, amà, frustrā, pratereā, ergā, intrā, $\bar{a}$.
Exc. Ită, quiă, ejă, pută put adverbially, and hallelujă, are short.
Note.-Alphă, Betă, the names of letters, have the $a$ short.

Exc. 1. The following words have $e$ long. Nouns of the First and Fifth Declension : as, Calliopē,* Anchisē ; rē and diē, with their Compounds, quare $\bar{e}$, hodiē, \&ूc.; Plural Greek Nouns: as, cetē, Tempē; and the Second Per. Sing. of the Imperative of the Second Conjugation : as, docee, mane.

Note.-The Doric Vocatives of Greek Nouns are long: as, Ulyssē, Achillē ; contracted cases: as, Diomedē for Diomedca, the contracted Genitive and Dative of the Fifth Declension : as, $d i \bar{e}$, , $f i \bar{e}$; likewise fame, which originally belonged to the Fifth. The Imperative cave has the last syllable common. This license is usually ex. tended to vale, vide, and responde, but not on good authority; in the best writers, where the reading is undisputed, they are always long.

Exc. 2. Monosyllables are long: as, $\bar{e}, m \bar{e}, t \bar{e}$; except the enclitic particles, $q u \check{,}$, v̌, $n \check{c}$ (interrogative), and the syllabic adjections $p t e ̌, c e ̌, ~ t e ̌: ~ a s, ~ s u a p t e ̌, ~ h u j u s c ̌ ̌, ~ t u t e ̌ . ~$.
Exc. 3. Adverbs derived from Adjectives of the Second Declen-

[^16]slon are long: as, placidē, pulchrē, doctissime ; except beň, male, inferně, and superně, which are short. Fermẽ, ferē, and ohē are also long.

The Datives and Ablatives Plural in si: as, heroiš, are short. Mihi, tibi, $s i b i, i b i, u b i$, and $c u i$ (a dissyllable), are common; nisǐ and quaš are always short.
Note.-The Compounds of $i b i, u b i$, and $u t i$ are peculiar. Ibi and ${ }^{2} b i$ have the $i$ common; but in alibi it is always long, and in necubi and sicubr̆, it is always short. The $i$ is always long in $u \bar{i}$ and veluti, but is always found short in sicuti.

## O.

47. O commune loces. Dabis at monosyllaba longis, Græcaque ceu Did $\overline{0}$, ternum sextumque secundæ, Et patrium Græcum, atque adverbia nomine nata, $Q u \bar{o}$ jungens et $e \bar{o} . \quad$ Variant at denuo, sero, Mutuo, postremo, vero : modŏ sed breve pones. Sxpiùs ambo, duo, scio corripe, et illico et imo, Et cedo da signans, ego, queis homo, cum cito, junge. Sunt aliis variata Gerundia, longa Maroni. Ergō pro causâ produc ; secus editur anceps.
O in the end of a word is common: as, leo, virgo, amo.
Note. -The poets of the Augustan age very rarely shortened final o in Verbs, or in Nouns of the Third Declension. Sciŏ and nesciŏ are often found short, and credŏ, putŏ, roğ, volŏ, when used parenthetically or in colloquial discourse. Instances of o being shortened in other verbs are very rare. Homŏ is found short in Catullus, nemŭ and leŏ in Ovid, and mentiŏ in the Satires of Horace. The later poets appear to have considered o common, and accordingly in their works it is verv often found short.

Exc. 1.-Monosyllables are long: as, $\bar{o}, d \bar{\delta}$, stō ; Greek Nouns : us, Didō," Sapphō, Athō (Gen.); the Datives and Ablatives of the Second Declension : as, domino $\overline{,}$ bo: $\overline{0}$; Adverbs derived from Adjectives : as, certō, crebrō, falsō, and ergō, on account of; likewise $q u \bar{o}$ and $e \bar{o}$, with the Compounds, $q$ w. vis, quōcunque.
Exc. 2.-Dcnuo, sero, mutuo, postremo, vero, are generally long, but sometimes short. Ambo, duo, scio, illico, imo, cedo (Defective Verb), ego, homo, and cito, are commonly short. Modǔ, and its Compounds, quomodŏ, dummod̆, \& \& c. are short.
Note-There appears to be a want of precision in the latter part of the preceding rule. The result of Professor Ramsay's minute examination is as follows: Final o in ambō, ergō, ideō, imō, porrō, postrcmō, quandō, serō, verō, is perhaps never found short except in writers posterior to the Augustan age. It is always short in the following words, in good writers : citŏ, duŏ, egŏ, octŏ, modŏ the Adverb, and its Compounds, dummodŏ, postmodŏ, quomodŏ, tantummodŏ. There does not appear to be any good authority for the distinction which is made in the rule between ergo, signifying on account of, and ergo, signifying therefore.

Exc. 3. The Gerund in dō is always long in Virgil, but is sometimes found short in the later poets.

## $\mathbf{U}$ and $\mathbf{Y}$.

48. U semper longis, sed $Y$ raptis jungere oportet.

U in the end of a word is long: as, vultū, corn $\bar{u}$, dictī.
$\mathbf{Y}$ in the end of a word is short : as, moly̆, Tiphy̆.

## B.

49. Corripe B Latium : peregrinum at tendere malim.
 from a foreign language are long: as, $J \bar{o} b, J a c o ̄ b$.
C.
50. C produc, præter něc, doněc : sed variabis

Hic bene pronomen: fac verbum jungimus isti.
C in the end of a word is long: as, $\bar{u} c, s \bar{u} c, i l l \bar{u} c, d \bar{u} c$.
Exc. Něc and doněc are short. The Pronoun hic, and the Verb fac, are common.
Note.-Hic, the Adverb is always long; hic, the Pronoun is twice found short in Virgil, but is generally long; hoc, which is also said to be common, is always found long, except in the comic writers. Fac appears to be always short.

[^17]
## D.

61. D breve ponatur. Variare at Barbara possis.

D in the end of a word is short: as, ăd, apüd, quud. Foreign words are common: as, David, Bogud.

## L.

52. L breve sit. Cum sōl, sāl, nīl, tolluntur Hebræa.

L in the end of a word is short : as, animăl, vighl, consŭl.
Exc. Sōl, säl, nül, with words adopted from the Hebrew, are long: as, Danièl, Nabūl.
Note.-Nil is long, because it is a contraction for nihil.
M.
53. M nunc vocalis perimit : rapuêre vetusti.
$M$ in the end of a word is cut off before a vowel; the earlier writers often preserved it, and made the syllable short

## N .

54. N produc. Demas En inis dans, quæque priore Greca per on casus numero tenuêre secundx;
Et quartum casum, si sit brevis ultima recti.
Sin quoque pluralis ternæ conjunge Pelasgum :

## SCANNING.

Scanning is the division of a verse into the several Feet of which it is composed.

A verse is a certain number of syllables disposed so as to form a line of poetry.
A Verse, when it contains the exact number of syllables, is called Acatalectic; when it wants one syllable at the end to complete the measure, it is called Catalectic; when it wants two syllables, it is called Wrachycatalectic; when it has a redundant syllable or foot, it is called Hypercatalectic, or Hypermeter.

A Foot is a portion of a Verse consisting of two or more syllables.

The feet most commonly employed in Latin verse are the follow. ing:-

1. A Spondee, which consists of two long syllables: as, rūpēs.
2. An Iambus-a short and a long syllable: as, dŏcēs.
3. A Trochec-a long and short syllable : as, nätŭs.
4. A Pyrrhic-two short syllables: as, dĕŭs.
5. A Dactyl-a long and two short syllables : as, pönĕrě.
6. An Anapast-two short and a long syllable: as, bŏnǔtās.
7. A Tribrach-three short syllables: as, lĕgĕrě.
8. A Choriambus-a long, two short, and a long syllable: as, cōmmĕmŏrās.

## C.ESURA.

Casura is the syllable which remains in the end of a word after the completion of a foot.

The Cæsura has received various names from the different positions which it occupies in the verse. When it comes after the first foot, or falls on the third half-foot, it is called Triemiměris, or the Triemimeral Casura; when it falls on the fifth half-foot, it is called Penthemimĕris; when it falls on the seventh half-foot, it is called Hephthemimerris; when it falls on the ninth half-foot, it is called Enneemi. měris: as,

Ille la-tus nive-um mol-li ful-tus hya-cintho.-Virg.
where $t u s, u m, l i$, tus, are examples of the Triemimeris, the Penthemimeris, the Hephthemimeris, and the Ennecmimeris.

The Cæsura is commonly a long syllable; but, when it falls on a syllable naturally short, it sometimes renders it long: as,

Omnia vincit am-ör, et nos cedamus amori.-Ovid.
The lengthening of a short syllable in the casura may probably be accounted for by the circumstance that the ancients in reciting their verses were in the habit of resting the voice emphatically on the casural syllables, and longer time being thus assigned to them in pronunciation, they would be artificially lengthened, though naturally short.

## FIGURES IN SCANNING.

Figures in Scanning comprehend the various changes which are made upon words to adapt them to the Verse.

## SYNALCEPHA.

Synalopha is the elision of the final Vowel or Diphthong, when the following word begins with a vowel : as,

Conticuere omnes intentique ora tenebant.-Virg.
The Interjections $o$, $h c u$, and $a h$, are not elided : as, $O$ et de Latiâ, o et de gente Sabinâ.—Ovid.
Other long Vowels and Diphthongs sometimes remain un-elided, and are then generally made short: as,

Glaucō, et Panopeaě et Inoo Melicertæ.-Virg.

## ECTHLIPSIS.

Ecthlipsis is the elision of $M$ with the preceding Vowel, when the following word begins with a vowel : as,
$\mathbf{O}$ curas hominum! o quantum est in rebus inane!-Pers.
Sometimes, however, the syllable is not elided : as,
Et tantum venerata virum, hunc sedula curet.-Tib.

## SYNRRESIS.

Synacressis is the contraction of two Vowels, which naturally make separate syllables, into one: as, Phathon, for Pha-ethon ; aureâ, for aure-â.

Inarime Jovis imperiis impôsta Typhöeo.—Virg.
Synæresis is frequently employed in the following words:
Antehac, anteit, alveo, eadem, codem, cui, huic, deest, deerat, decrit, dehinc, dein, deinceps, deinde, dii, diis, ii, iidem, iisdem, \& ©.
$I$ and $u$ are frequently changed into $j$ and $v$, and joined, in pronunciation, with the following vowel: as, abjete, for abiete; genva, for genua.

Edificant, sectâque intexunt ăbjĕte costas.-Virg.
Genva labant, gelido concrevit frigore sanguis.-Virg.

## DIARESIS.

Diareresis is the division of a Diphthong into two syllables: as, aulāi for aulce ; sŭadent for suadent.

Aulāi in medio libabant pocula Bacchi.-Virg.
$J$ and $v$ are sometimes changed into $i$ and $u$, and form separate syllables : as, subrecta, for subjecta; silür, for silva.

Si qua ferventi subïecta Cancro est.-Senec.
Aurarum et silüic metu.-Hor.

## DIFFERENT KINDS OF VERSE.

## 1. HEXAMETER.

Hexameter or Heroic verse consists of six feet, of which the fifth is a Dactyl, and the sixth a Spondee; the other four may be either Dactyls or Spondees indiscriminately : as

> Tīty̆ř̌- tū pătŭ- læ rěcŭ- bāns sūb- tēgmĭnĕ- fāgi.- Virg. Intōn- sī crī̀- nēs lüng- gā cēr- vīcé fŭ- ébāt.-Tib.

Sometimes a Spondee occurs in the fifth place; whence verses so constructed are called Spondaic : as,
Cāră dě- ūm sŭbŏ- lēs māg- nūm Jŏv̌̌s- Incrê- mēntūm.-Virg.
Spondaic verses are sometimes employed in solemn and mournful descriptions, to express dignity, gravity, \&c., and generally end in a word of four syllables, with a Dactyl in the fourth foot.

## II. PENTAMETER.

Pentameter verse consists of five feet. It is commonly divided into two parts; the former consisting of two feet, either Dactyls, or Spondees, and a Cæsura; the latter always containing two Dactyls and a Cæsura : as,

Cārminň- būs vīv- ēs- tēmpŭs în- ơmnĕ mě- ìs.-Ovid.
This verse is generally combined with Hexameter in alternate lines, and from this union is constituted, what is termed Elegiac verse.

## III. ASCLEPIADEAN.

Asclepiadēan verse consists of a Spondee, a Dactyl, a Cæsura, and two Dactyls: as,
Maēcē- nās ătă- vīs- ēdǐtě- rēgǐbŭs.-Hor.

This species of verse, which is otherwise called Choriambic Trimeter Acatalectic, may also be scanned by a Spondee, two Choriambi, and an Iambus.

## IV. GLYCONIAN.

Glyconian Verse consists of three feet ; a Spondee, and two Dactyls: as,

Rēddās- inncŏlŭ- mēm prěcŏr.—Hor.
This species of verse, is otherwise called Choriambic Dimeter Aca. talectic, and may be scanned by a Spondee, a Choriambus, and an Iambus. Glyconian verse is usually combined with Asclepiadean.

## v. SAPPHIC and ADONIAN.

Sapphic verse consists of five feet; a Trochee, a Spondee, a Dactyl, and two Trochees: as,
Jām yă- tīs tēr- rīs nĭvǐs- ātquě. diræ.-Hor.

Adonian verse, otherwise called Dactylic Dimeter Acatalectic, consists of a Dactyl and a Spondee: as,

Tērrǔt- ârbēm.-Hor.
Sapphic and Adonian verses are always combined by the lyric poets, in stanzas, consisting of three lines of the former, followed by one of the latter.

## Vi. Pierecratian.

Pherecratian verse consists of three feet; a Spondee, a Dactyl, and a Spondee : as,
Quāmvīs- Pōntičă- pīnūs.-Hor.

Pherecratian verse is otherwise called Choriambic Dimeter Catalec. tic, and may also be scanned by a Spondee, a Choriambus, and a Catalectic syllable. This verse is combined by Horace with Asclepiadean and Glyconian.

## VII. PHALEUCIAN.

Phaleucian verse consists of five feet; a Spondee, a Dactyl, and three Trochees: as,

> Sūmmām- nēc mětǔ- ās dĭ- ēm nĕc- ōptěs.-Mart.
> VIII. ALCAIC or horatian.

The Alcaic or Horatian stanza consists of four lines, of which the first two are Greater Dactylic Alcaic; the third, Archilochian Iambic ; and the fourth, Lesser Dactylic Alcaic.

Greater Dactylic Alcaic consists of a Spondee (varied sometimes by an Iambus), an Iambus, a Cæsura, and two Dactyls: as, Cēdēs- cǒēm- tīs- sāltǐbǔs- ēt dŏmǒ.-Hor. Vǐdēs- ŭt âl- tā- stẽt nǐvě- cāndǐdŭm.-Id.

Archilochian Iambic has a Spondee in the first and third places, an Iambus in the second and fourth, with a Cæsura in the end of the line. The first foot is sometimes an Iambus: as,

$$
\begin{aligned}
& \text { Nēe sū- mĭt aūt- pōnīt- sěcū- res.-Hor. } \\
& \text { Stêté- rě cāu- saē cūr- pěrí- rēnt.-Id. }
\end{aligned}
$$

Lesser Dactylic Alcaic consists of two Dactyls followed by two Trochees: as,

> Arbĭtrǐ- ō pŏpŭ- lāriss- aūræ.-Hor.

Alcaic verse is called Horutian from its being used by Horace more frequently than any other description of lyrie metre.

## IX. IAMEIC.

There are two kinds of Iambic verse, the one consisting of four feet, the other of six. The former is called Iambic

## Dimeter Catalectic; the latter, Iambic Trimeter Acatalectic.

Iambic Verse originally admitted of no other foot but the Iambus : as,

$$
\begin{aligned}
& \text { Inār- št aē- stǔō- sīūs.-Hor. } \\
& \text { Sǔīs- ět īp- să Rō- mă vì- ribūs- rūīt.-Id. }
\end{aligned}
$$

Afterwards, other feet, as the Spondee, the Dactyl, the Anapæst, and the Tribrach were admitted into the first, third, and fifth places, and sometimes, but very rarely, into the second and fourth. The last continued invariably an Iambus : as,

Cānưdĭ- ă rō- dēns pōl- lĭcēm.-Hor.
Vǐdē- rě prŏpeč- rāntēs- dŏmūm.-Id.
Quōquō- scêlès- tī rŭř- tǐs aūt- cūr dēx- těrīs.-Id.
Păvídūm- quĕ lĕpǒ- rum aūt- ād- věnăm- lăquěō- grǔēm.-1d.
Aľitǐ- bǔs āt- quĕ cănĭ- bŭs hǒmĭ- cỉdam Hēc- tŏrĕm.-Id.
Comic writers sometimes use an Iambic verse consisting of eight feet, and therefore called Tetrameter, or Octonarius.

Besides these, the following kinds of verse are employed in the lyric writings of Horace:

1. Dactylic Trochaic Archilochian, consisting of seven feet, of which the first four are either Dactyls or Spondees, the remaining three are Trochees: as,

Sōlvĭtưr- ăcris hĭ- ēms grā- tā vǐcě- vērǐs- êt Fă- vōnĭ.-Hor.
This verse is used in alternate lines with the following, B. I. Od, IV.
